## ACKNOWLEDGEMENT

- First of all we are sincerely thanked to Saurashtra University for giving a project as a particular subject.
- We are also greatly grateful to our **Geetanjali Group of colleges**.
- We are also greatly grateful to our college. We would like to thanks **Prof. Brijesh Shah (HOD)** for providing us opportunity to prepare this project.
- To complete this project many persons help us. But we are specially thanked to **Prof. Mital Goswami** for guiding our project analysis and development. They help our conceptualized the idea of the project and helped us streamline our work by providing us with every facility required.
- Not only college and guide help us but all the well wisher who gives us excellent support in during project.
- Thanks to all

Your Faithfully,  
Aayush Pathak

## PREFACE

In 21st Century of Technology, Computer and related service is the most useful, automatic and highly speed of work. B.C.A is course in which practical aspect is important as theoretical aspect. In the present world importance of education is increasing. The project training in a student's life is like a live experience in the industry. If we have experience then & then we get top of the level.

Most Important Factor of B.C.A Course is Project Work. The Project Work is Must for Every Student in Different Government or Private Organization during the Study Period.

We are developing project in 5th Semester of B.C.A we are the student of Geetanjali Group of Colleges Is Affiliated with Saurashtra University, Rajkot.

I created this project dynamic and in this project we provide select, insert, update and delete operation on client side and select, block, unblock, make admin, remove admin operation at admin side user can easily show site and give feedback. In client side there is so many features like view all post, delete & edit post if the user id and post user id is same, user profile, user posts count, specific user post, etc.

As this is fully and educative project site so it has made many limitations as per the fully furnished site view.

I have gone through and study necessary information, which is collected and presented in this report. I am trying my best in this project. I had taken almost care that the information provided in the project is true and project is in a smooth running condition and error free.

## **Profile of project**

<b>Project Title</b>	<b>: Flexibbble</b>
<b>Development Software</b>	<b>: Visual Studio</b>
<b>Front End</b>	<b>: ASP.NET</b>
<b>Backend</b>	<b>: SQL SERVER</b>
<b>Academic Year</b>	<b>: 2023-2024</b>
<b>Developed By</b>	<b>: Aayush Pathak</b>
<b>Submitted To</b>	<b>: Geetanjali College</b>
<b>Documentation Tool</b>	<b>: Microsoft Word</b>
<b>Operating System</b>	<b>: Windows</b>

## SYSTEM REQUIREMENT

There are two types of system requirement.

- Hardware
- Software

### ➤ **Hardware:-**

- Processor:-  
8 Bit, 2 core, 1.2 GHz or higher.
- RAM:-  
4GB for development and evaluation use or more
- Hard disk:-  
100 MB or More

### ➤ **Software:-**

- Platform:- Windows
- Operating system:-  
Windows 10 profession or any
- Front End tool:-  
ASP.NET TAILWIND  
CSS BOOTSTRAP
- Back end tool:- SQL server
- Editing tool:-  
Microsoft Visual Studio 2022

- Browser:-  
Internet Explorer or  
Mozilla Firefox or  
Google Chrome or Any browser

## DATA DICTIONARY

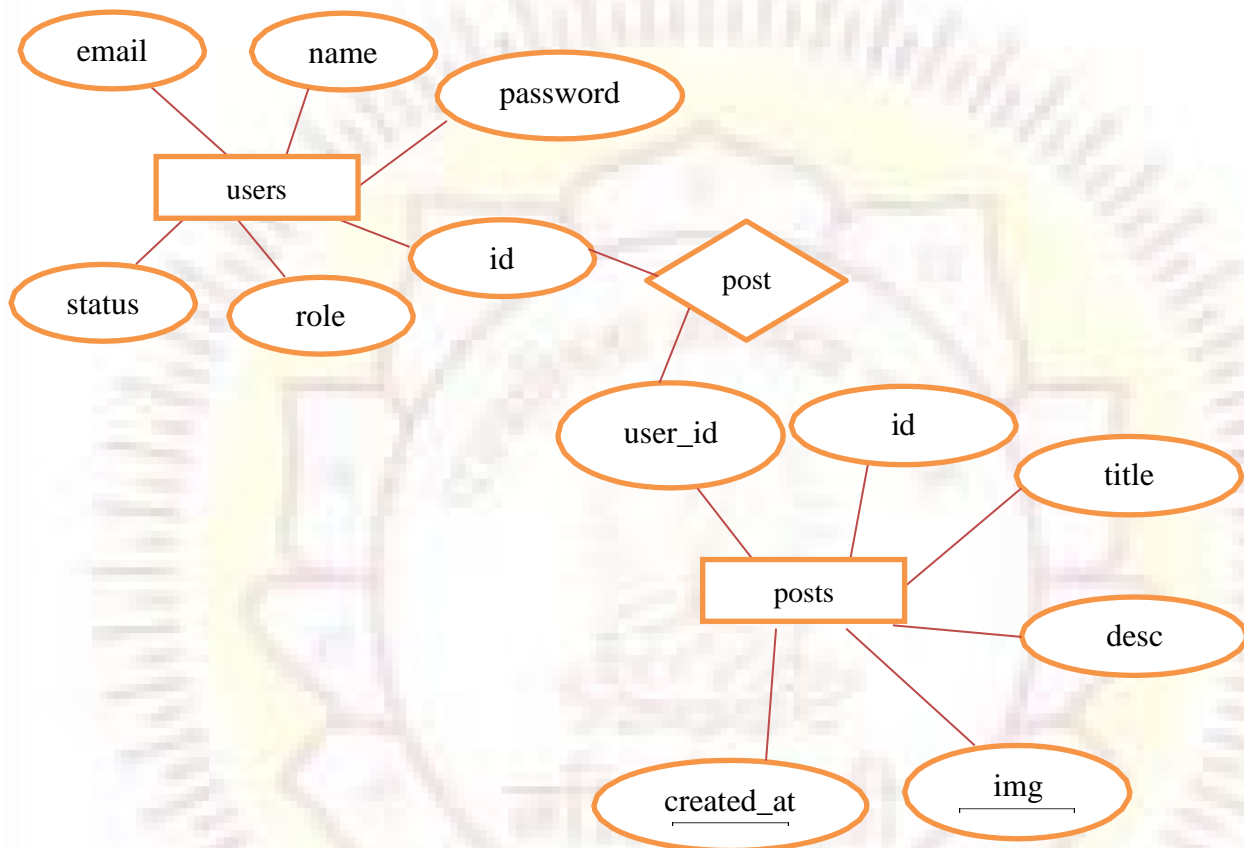

### ○ users:-

Field Name	Data Type	Description
Id	int	Primary Key
name	varchar(50)	Take Name
email	varchar(50)	Take Email
password	varchar(50)	Take Password
role	nchar(1)	To check the role
status	nchar(1)	To check status
logged_in	varchar(100)	To Authenticate User

### ○ posts:-

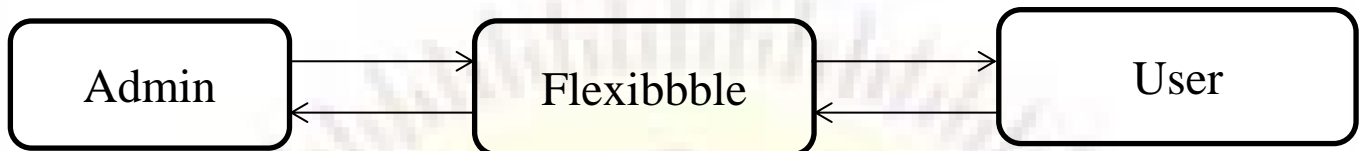

Field Name	Data Type	Description
Id	int	Primary Key
title	varchar(200)	Take title
desc	text	Take description
img	varchar(200)	Take Image Link
user_id	varchar(10)	Take User Id
created_at	varchar(50)	Created Date

## SCREEN SHOTS

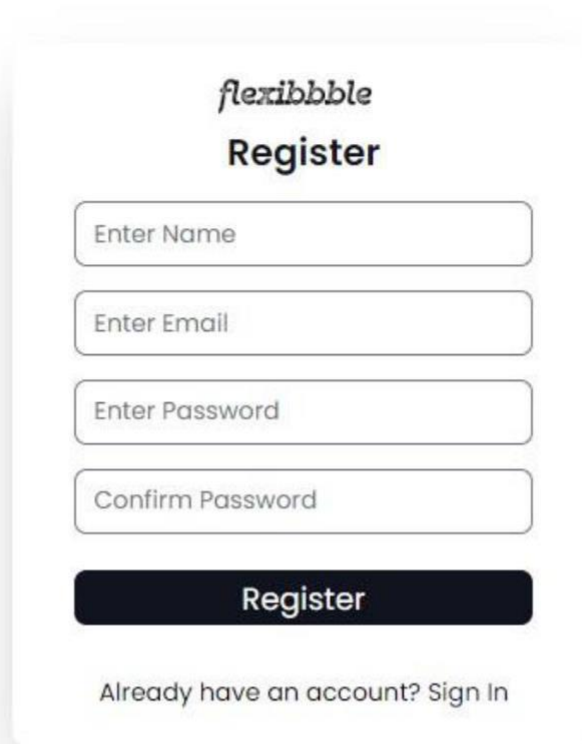

### UserSide :

Login Page:-

A screenshot of the Flexibbble login page. The page has a light gray background with a faint, colorful geometric pattern. In the center, there is a white rounded rectangle containing the login form. At the top of this rectangle is the 'flexibbble' logo in a lowercase, italicized font. Below the logo is the word 'Login' in a bold, black font. There are two input fields: the first is labeled 'Enter Email' and the second is labeled 'Enter Password'. Both fields have a light gray border and a small eye icon on the right side. Below the input fields is a dark blue button with the word 'Login' in white. At the bottom of the white rectangle, there is a link that says 'Don't have an account? Sign Up'.

- This is the login screen.
- User can Log in with this and with their proper credentials if the credentials will wrong then the error message shown to the user
- User click on log in button and if credentials is perfect they can be logged in and redirected to the home page

- Register Page:-

The image shows a registration form for 'flexibbble'. The form is centered on a light gray background. It has a white card-like appearance with rounded corners. At the top, the word 'flexibbble' is written in a lowercase, italicized font. Below it, the word 'Register' is written in a bold, black font. There are four input fields, each with a placeholder text: 'Enter Name', 'Enter Email', 'Enter Password', and 'Confirm Password'. Below these fields is a dark blue button with the word 'Register' in white. At the bottom of the card, there is a link that says 'Already have an account? Sign In'.

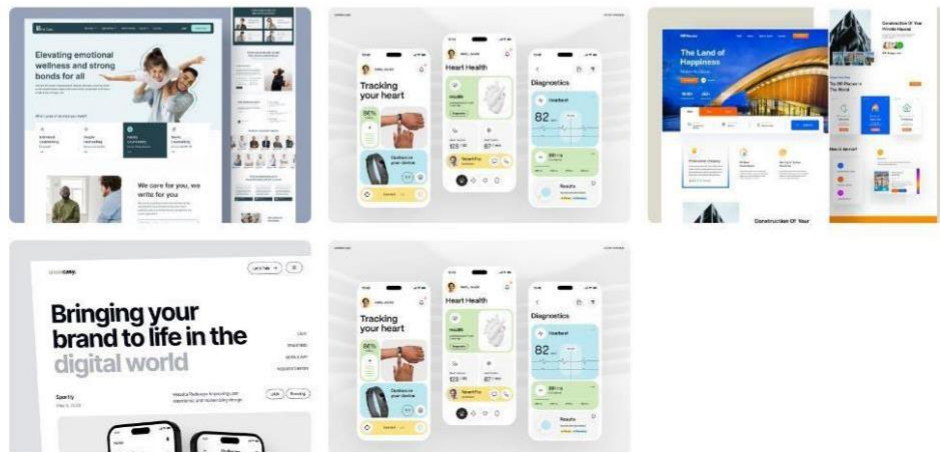

- This screen is used to do Register and fill the credentials appropriately and do the log in with that credentials

# A Design Community Website

- Index Page without logged in :-

Flexibble

Login [Signup](#)

○

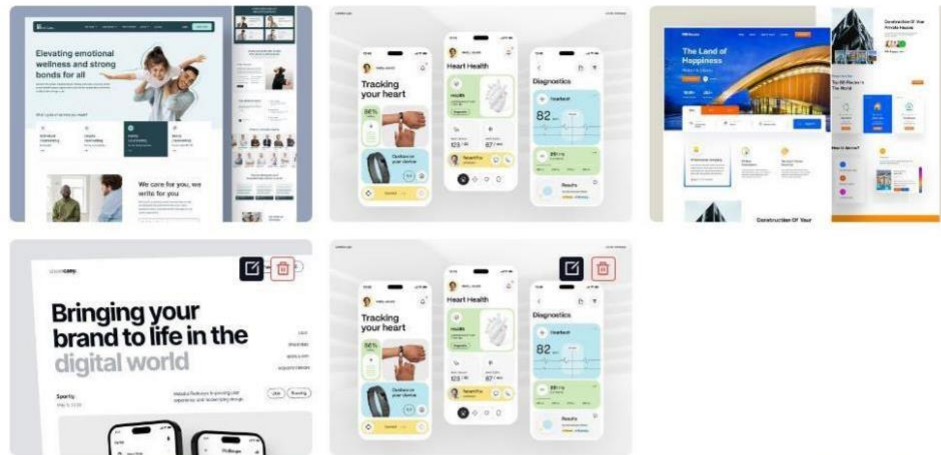

This page is main home page of the project both authenticated as well as non authenticated users will have the access of this page but if the user is not logged in then they can only see the post they can't create or edit the post without login

# A Design Community Website

- Index Page with user logged in:-

Cancel Update Delete

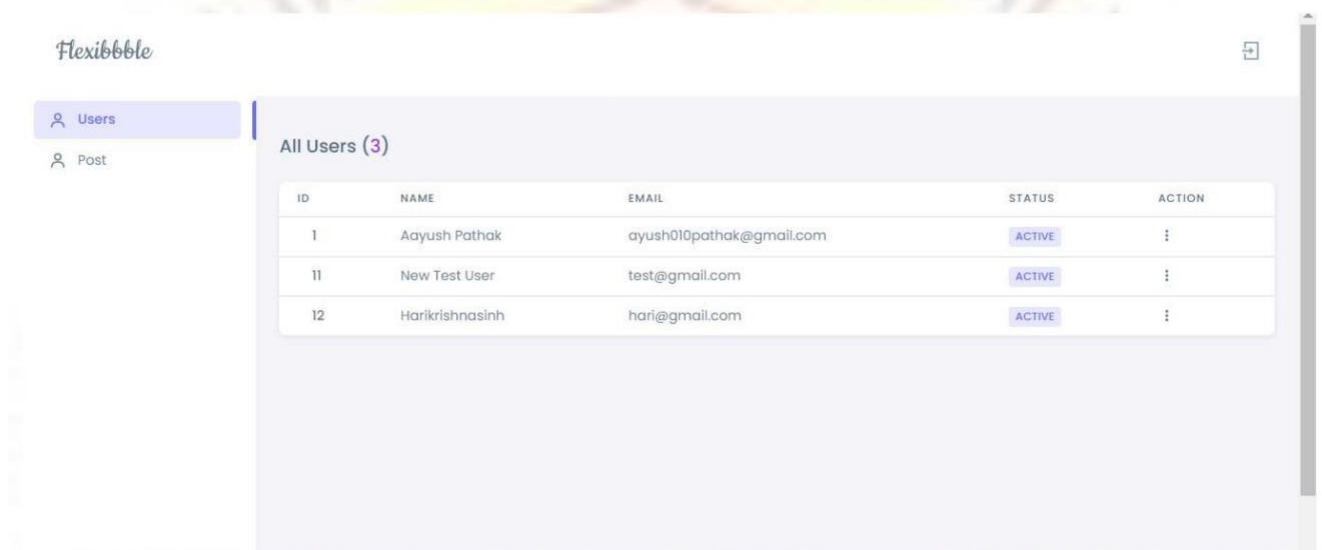

○

Here in this page the user can edit the post if the post is created by the logged in user. If the user is not logged in then it will be redirected to the home page

## Admin Side:-

➤ The admin can access the panel if the role in the user table is 1 if it's 0 then it will be redirected to the home page

### ○ All User Page:

○ This page can be accessed by the admin only so first we check the admin page that it's authentic or not we used asmx web services for api.

○ This page contains all user data in our site and total no of users also.

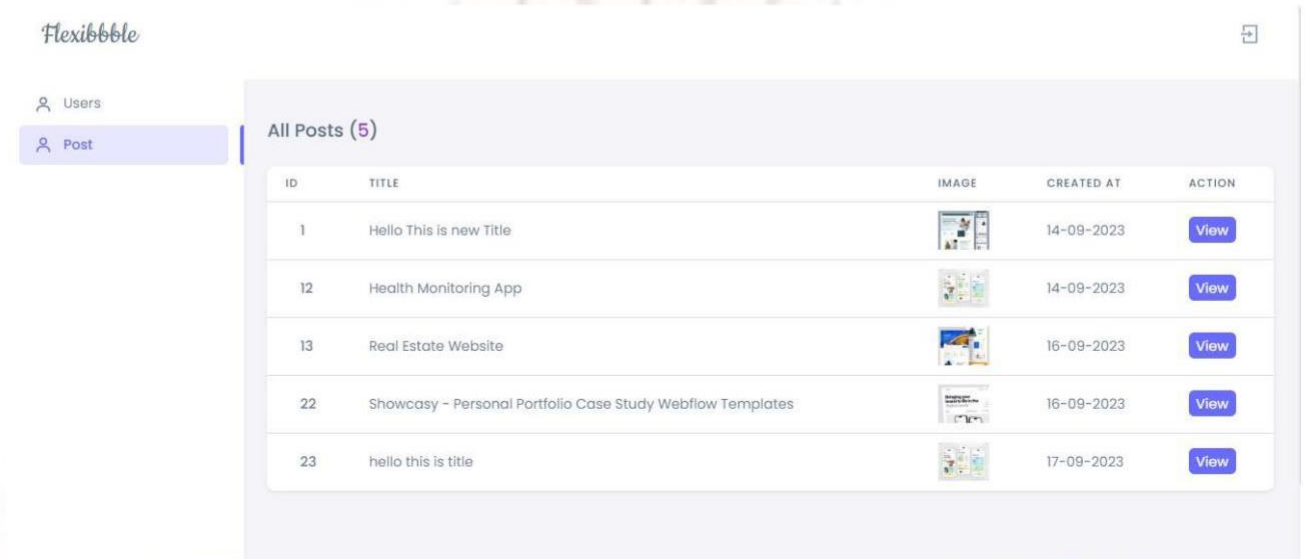

○ The admin can make admin to anyone. And also remove the admin if it's already the admin

○ The admin can block and unblock the user if the user is not admin.

○ The blocked users cannot log in in this website

○ From this the user can also view the single user profile by clicking the View Profile link in the actions menu

## ○ Post Page:-

- This page is posts page where all the post is displayed here with the date image and name column.

## FUTURE OF PROJECT

In future we will provide the facility more on admin side and login , register which is very essential for admin point of view

We are also focusing more on the frontend as well with the designing point of view with colors the buttons and many more

We will be hosting this site and get the official certificate as well and grow this site

## BIBLIOGRAPHY

I used many online references to create this site with The Names of all the sites given below

C# Corner

Stack Overflow

Chat GPT
